

Dear Sirs:

Our K-Love radio station in Virginia Beach (90.7) has been of tremendous support to our family and our community. We rely upon it to get through our days with hope and strength. We support Christian radio with our prayers and donations because we strongly believe that Christian radio, and specifically our K-Love station, saves lives. The message that is being sent is uplifting and brings hope in all situations. This strengthens our community and our world. The First Amendment protects this station from burdensome regulations and costs associated with those regulations. The Message should not be "edited" by Community Advisory Boards because this would create a situation in which freedom of speech and religion would be jeopardized. Additional staffing should not be required because of the burdensome cost associated with such a requirement that would drive smaller, poorer stations off the air. Translator Stations should not be forced off the air by LPFM stations because the investment made in the Translator Stations should be acknowledged and respected. We respectfully submit these comments praying that you will take them under careful consideration, and keep our K-Love station on the air with a minimum of burdensome regulations and costs. Thank you for your consideration.

Sincerely,
The Sipe Family
4700 Eastwind Road
